

NEWMAN SANITARY GASKET LINE CARD

Newman superior products give you maximum performance and unequaled longevity for product life. Guaranteed 100% FDA compliant compounds — Buna-N, EPDM, Viton®, Silicone, and Teflon®

LIM Gaskets

(Liquid Injection Molding) Provide precision silicone gaskets for the food and pharmaceutical industries.

Class VI Material

EPDM, Viton® and Silicone compounds have been tested and certified to be in compliance with the USP Class VI Criteria.

Clamp Gaskets

- Standard
- Flanged
- Teflon® Envelope

Bevel Seat Gaskets

- Standard 45° C.I.P., 90 durometer
- Teflon® - standard & heavy duty
- Flat style
- Converted Bevel Seat

Pipe Hanger Sleeve System

For processing piping applications; outperforms conventional assembly systems in every way.

Q&I Line Gaskets

- Available in all compounds
- Schedule 5

"O"-Rings

For popular centrifugal and positive displacement pumps and equipment. All standard sizes available. The largest inventory of FDA compliant "O"-Rings in North America.

Schedule 5 Gaskets

- Standard • Teflon® Envelopes
- Flanged • I-Line

Orifice Plates

- 316L stainless steel inserts
- Bonded or removable
- Solid rubber or solid teflon

Sock Screen Gaskets

For plant intake and bulk tank applications. Speeds unloading and reduces cost.

Screen Gaskets

- Available in 316 wire mesh and perforated disc in a number of sizes.
- Bonded or removable

Silverback™

50/50 blend of PTFE and 316 stainless steel. Lasts up to 5 times longer in most applications.

Casing Gaskets

For centrifugal pumps.

Body Gaskets

- For automatic air valves.
- 316 stainless steel insert
- Solid rubber

John Perry

Bun-N, EPDM, Viton, Silicone, and Teflon®

Acrylic Sight Glass

Available in four styles:
• Tri-Clamp • I-line
• Q-Line • Bevel Seat

Tank Gaskets

- For all tanks, single and double flanged styles.
- Sight glass gaskets.

ISO/DIN Gaskets

Hygienic flanged clamp gaskets for the pharmaceutical and biotech companies. Manufactured in Viton®, EPDM, & silicone that meet both FDA and Class VI criteria.

Custom Molded Parts

Produced to your specifications for your specific application with only FDA compliant compounds.

PRODUCTS OF INTEGRITY...FROM PEOPLE OF INTEGRITY

BENEFITS OF NEWMAN SANITARY GASKET

Newman Sanitary Gasket Company's Quality Management System is certified by NSF-ISR to ISO 9001:2008

Rubber compound formulations have been developed exclusively for Newman Sanitary Gasket Company. Most compounds have been in use for more than thirty years.

100%
TRACEABLE

Newman manufactures 100% FDA compliant parts. NO commercial grade rubber is ever used. Newman products are 100% traceable with a batch and cure date of when the product was manufactured.

Newman compounds have the best physical characteristics of all FDA compliant elastomers.

Newman is the only source that manufactures their own parts. Competitors use off-shore sources of questionable quality often not complying with the criteria of the FDA.

Newman supplies manufacturers of sanitary process piping in North America and the major part of those in Europe. Quality is the key to this success as parts meet the very rigid specifications of many manufacturers of pharmaceutical equipment and processing plants world wide.

Newman gaskets, "O" rings and custom molded parts are all made from our special formulations of Buna-N, EPDM, and Silicone compounds. Viton® and Teflon® materials come from DuPont Performance Elastomers.

Newman's EPDM, silicone and Viton® compounds comply with the FDA and US Pharmacopoeia Class VI Section <88> Biological Reactivity Test, in Vivo and will be certified to these standards.

Newman is the only source for FDA compliant gaskets, "O" rings and custom molded parts that you can buy from direct.

Newman has technical support on staff: chemist, application engineer, quality control manager and customer service personnel.

Newman has a partnership relation with DuPont Performance Elastomers and only Newman has the new family of Viton® GF for our clamp gaskets and "O" rings.

TEFLON®

Newman is the only source of FDA compliant clamp gaskets that are manufactured with genuine DuPont Viton® and Teflon®. Competitors use brand X.

Newman is THE source to reduce the cost of expensive and long lead time for maintenance repair operations requiring FDA compliant rubber and parts made with Teflon®.

Newman is THE source for FDA compliant extrusions, an impossible part to source.
