

NEWMAN

SANITARY GASKET COMPANY

TEFLON® PRODUCTS

In an effort to meet the ever-growing need for high quality, high performance products, Newman has a special area dedicated solely to the production of Teflon® parts. These quality parts are manufactured in a temperature regulated facility within our plant and our custom designed equipment allows us to produce standard molded parts to your specifications and application needs.

Our custom facility allows us to provide you with high volume automated products. You're assured of FDA products of the highest quality and full quality assurance from start to finish. Newman Sanitary Gasket is a licensed manufacturer of Teflon® gaskets for the food, beverage, and pharmaceutical processing industries. We have continued to work and improve the performance of our Teflon® products through the license agreement with DuPont and will continue this endeavor in the future to make sure our customers receive the highest quality products and service they deserve.

Newman's Teflon® sanitation requirements are unsurpassed in the industry.

- Manufactured from pure virgin Teflon® from DuPont Dow
- FDA and USP Class VI certified
